

TODO APP Backend

Create Project

Exercise1

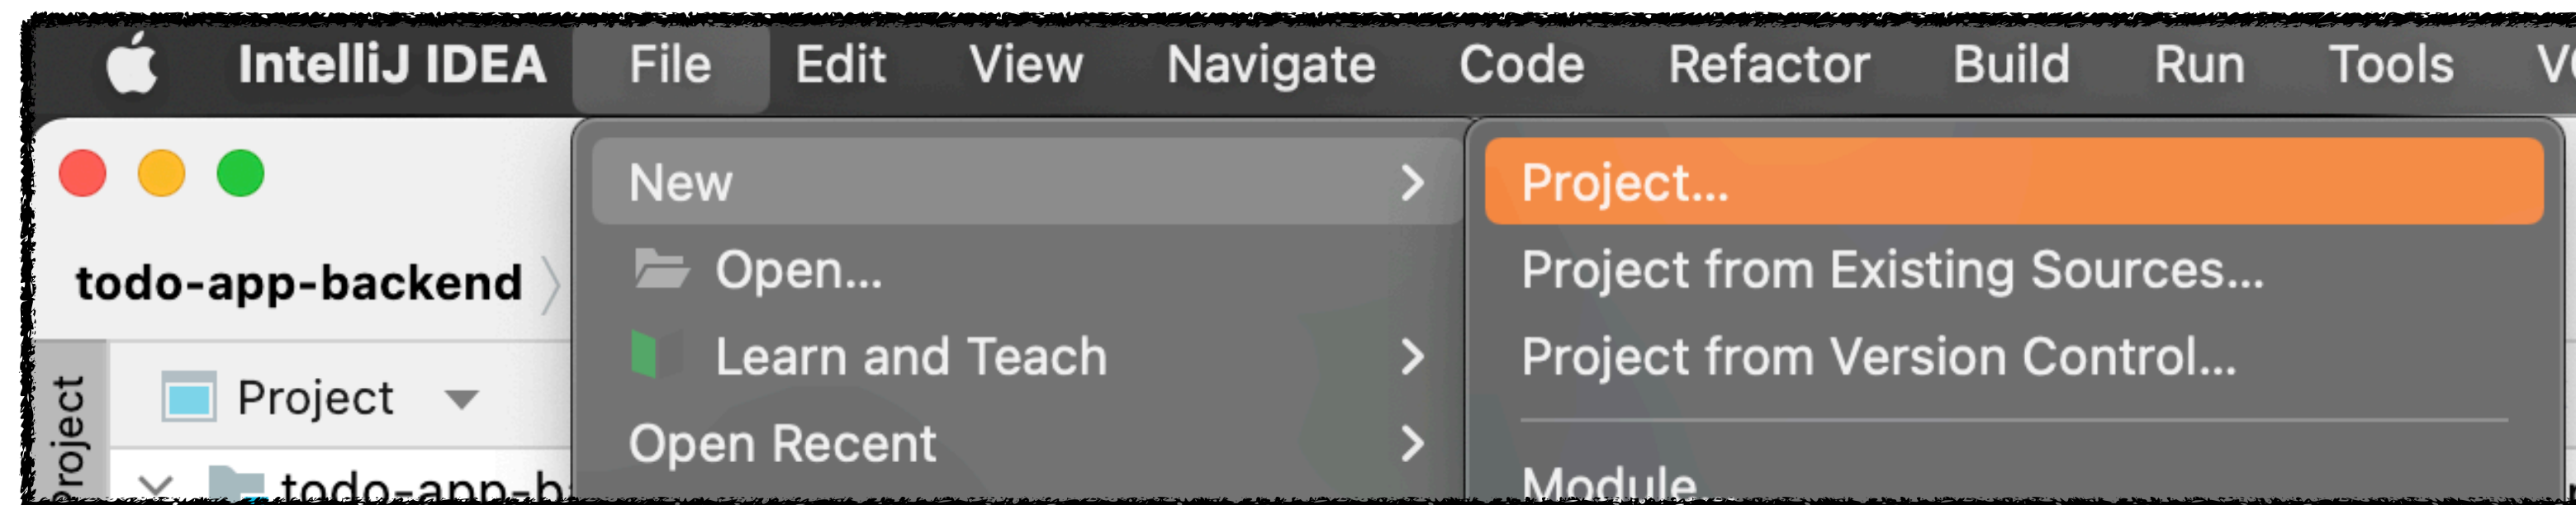

- Check if Initializer Plugin is installed in IntelliJ

Create Project

Exercise1

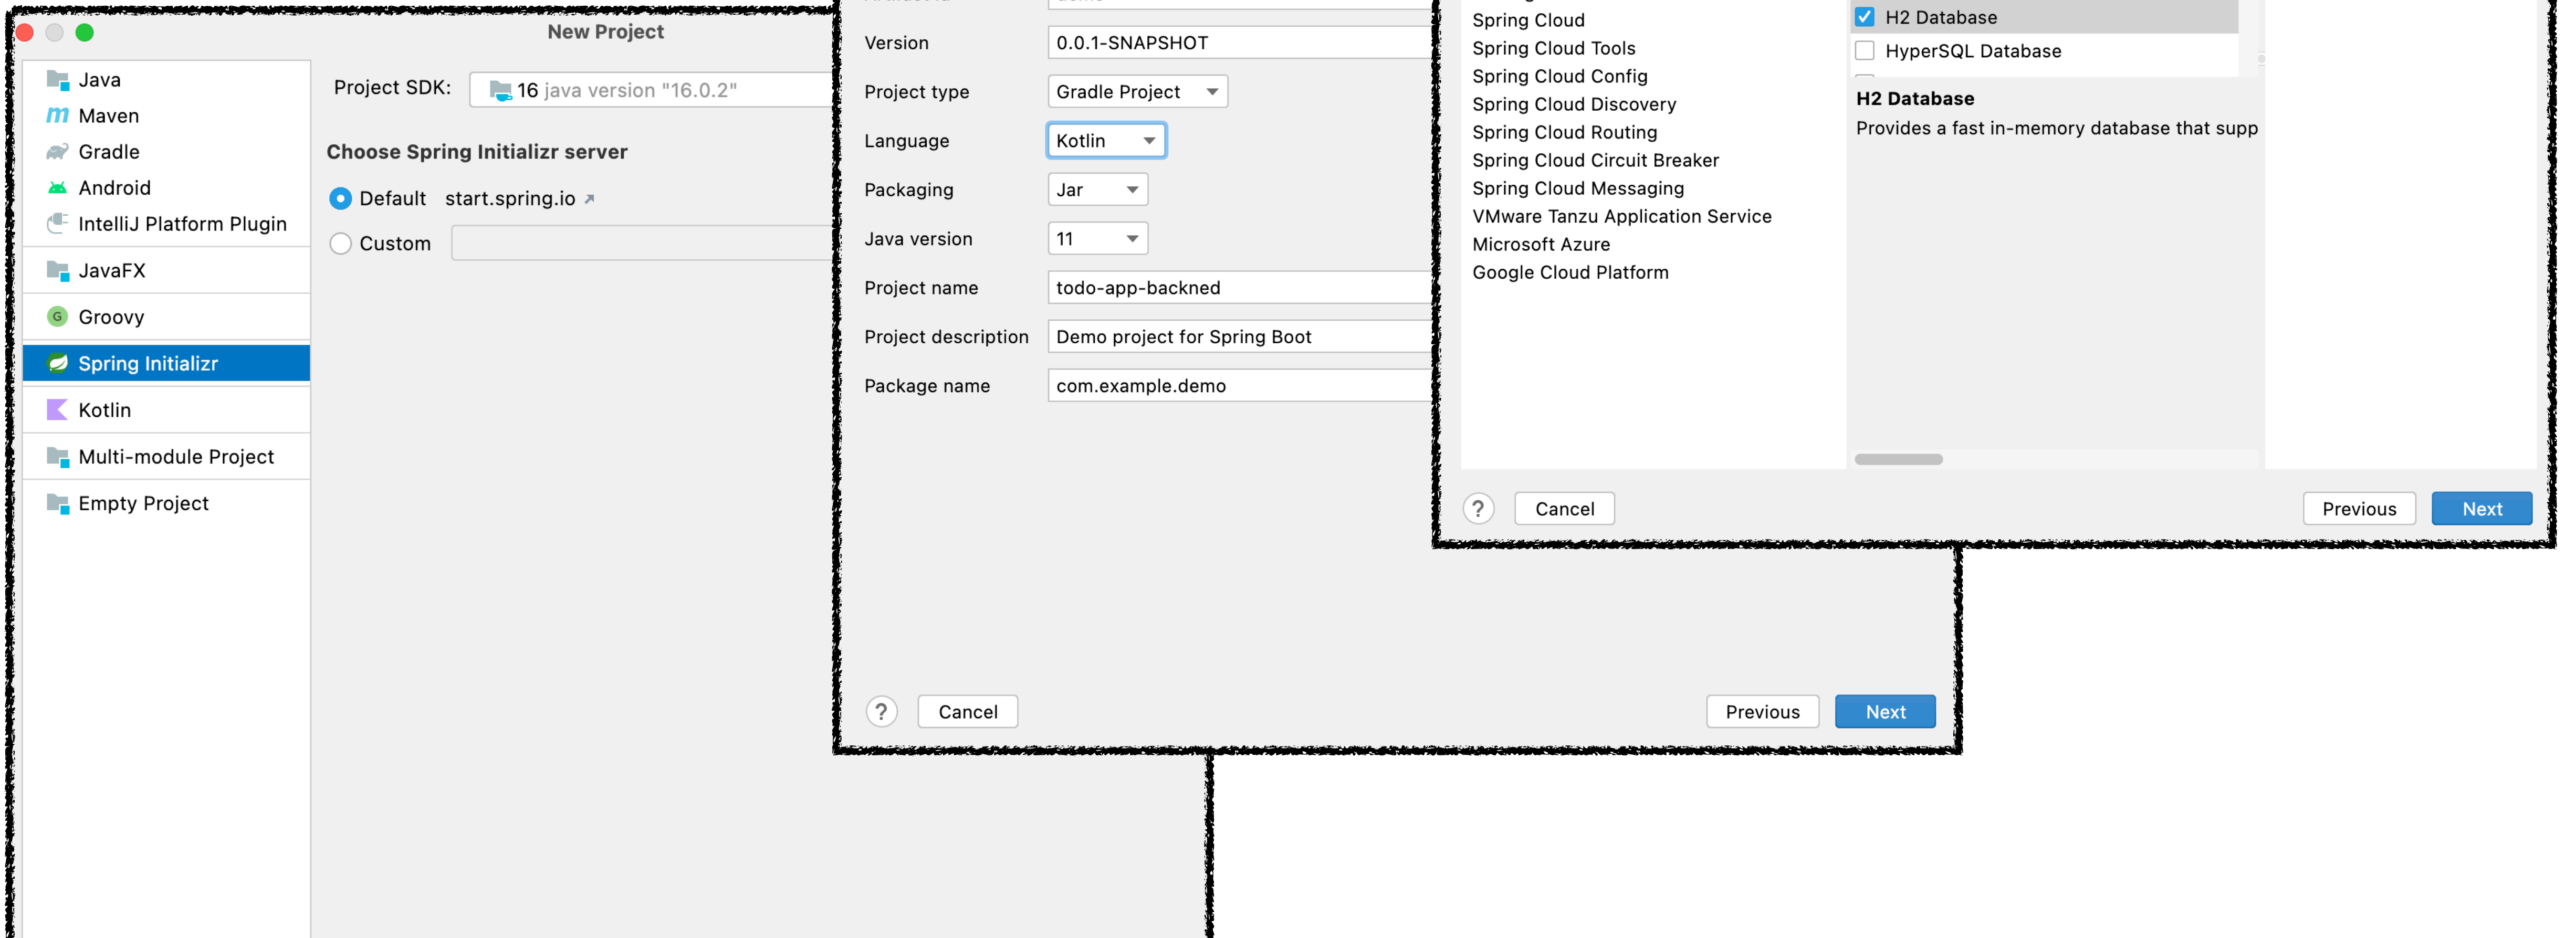

- Create new project

Create Project

Exercise1

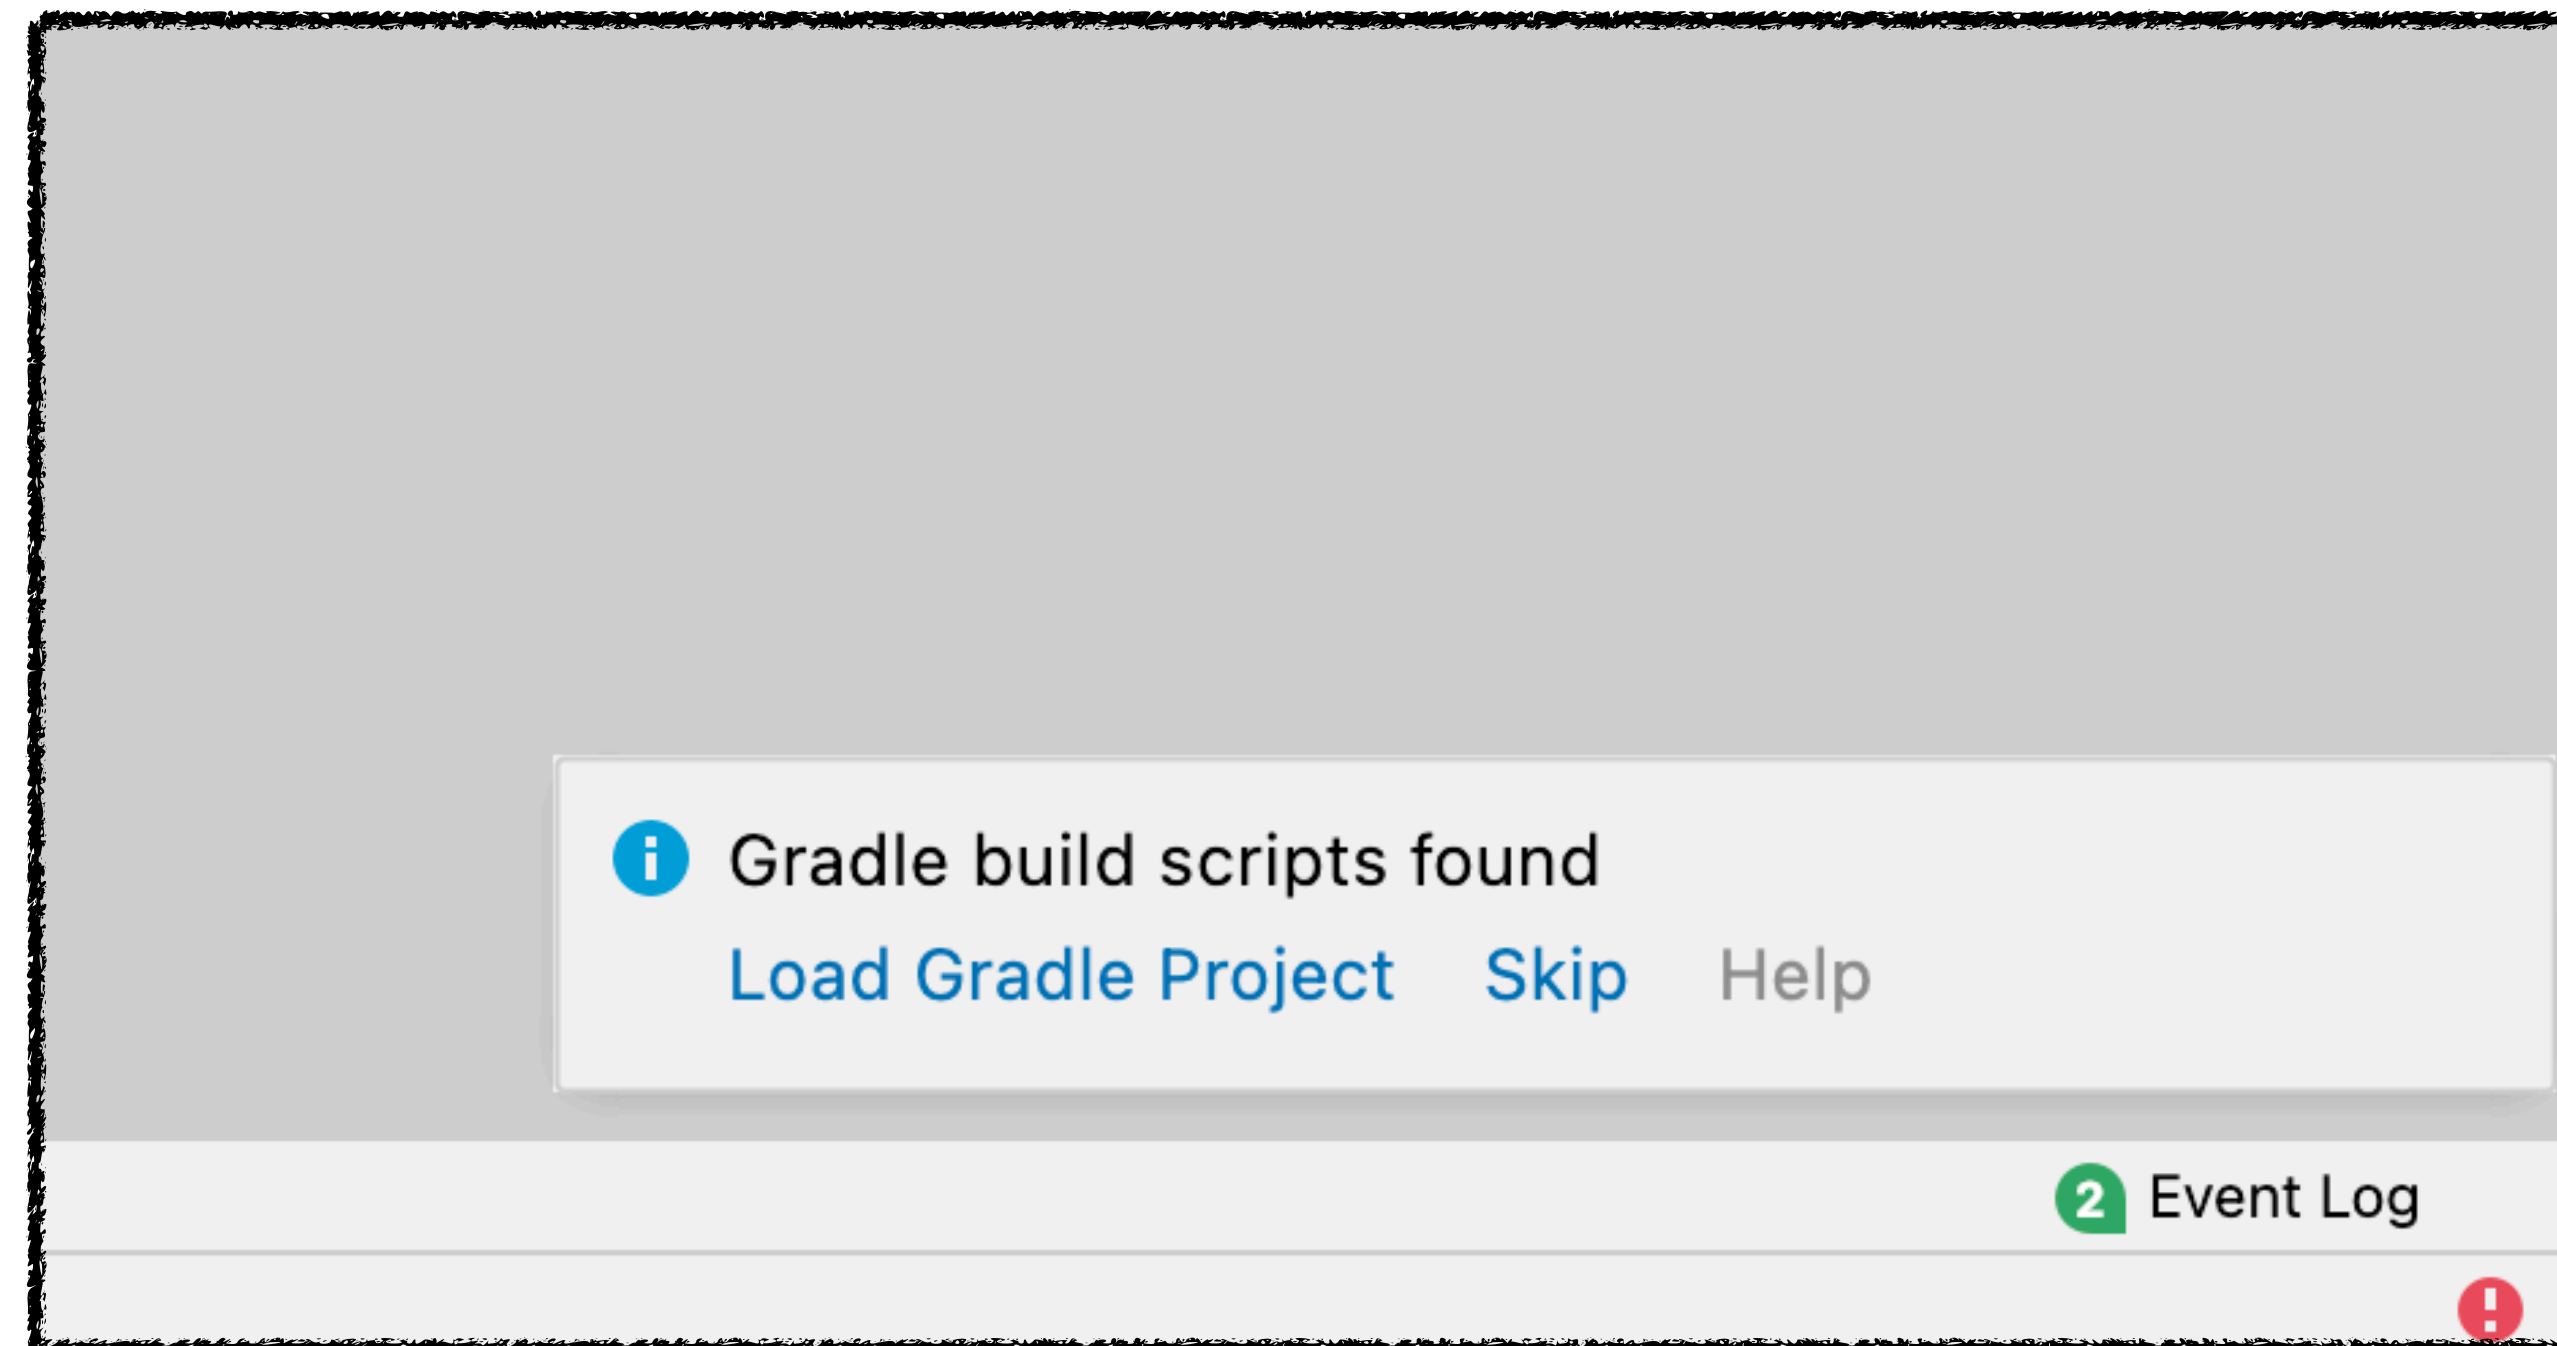

- Create new project

Open Project in IntelliJ

Exercise1

- Load Gradle Project (bottom right corner in IntelliJ) should appear
 - click it

Run Project

Exercise1

```
Terminal: Local x + v
~/github/demo5 ▶ ./gradlew bootRun
Configuration on demand is an incubating feature.

> Task :bootRun
